RAYBO 38 — Nilflo

Controls Settling Eliminates Sagging

REFERENCE	FEATURES	SYSTEM	COMMENTS	USAGE (%)	REFERENCE
	Controls Sagging and Settling	Solvent	High Compatibility	0.3-1% of Total Weight	

PERFORMANCE

RAYBO 38 is a highly compatible additive for control of sagging and settling in solvent borne systems.

The use of RAYBO 38 permits control of sagging and settling with no adverse effects on color, gloss or drying time. It will produce a significant reduction in flow with a minimal increase in viscosity. The maximum effect is evident immediately and remains stable during storage.

RAYBO 38 will not produce seeding common to most other grind-in flow control additives. Best results require incorporation into the grind paste.

ADVANTAGES

- High system compatibility
- Will not promote seeding

RECOMMENDATIONS

For Sagging and Settling Control - 0.3-1% of Total Weight
Must be added in grind-phase. Use in combination with oxygenated solvents not recommended.

PHYSICAL DATA**

Weight/Gallon 7.5 lbs.
 Solids 70.0%
 Appearance Tan Paste

CONTAINER SIZES

North American: 5 gal. pail*, 55 gal. drum, and bulk.
 Global Zones: 5 gal. pail*, 55 gal. drum.

* One gallon containers available upon request.
